Cartesio

The Cartesio bookcase, specifically conceived for the Bonnefanten Museum in Maastricht, echoes Rossi's typical building façades with square windows, each with a cross formed by a single mullion and transom.

The bookcase is composed of painted sheet metal modules in three heights, which can be combined as desired. Cartesio is available in an open version or enclosed by a windowed façade in American cherry wood and extra-clear glass, a sort of "curtain wall" cut from a single sheet of plywood.

China red and Madonna blue, vibrant colours much beloved by the Milanese architect, finish the interior of the bookcase.
