Designed by Fernando Urquijo and Giorgio Macola, Mood is a family of furnishings for individual and group workspaces with a functional and comfortable feel. Each of the components is characterized by a strong identity and precise purpose, allowing them to stand alone or to become elements of refined furnishing compositions that create warm, welcoming atmospheres.

The Mood series consists of desks in various shapes and sizes, carefully designed in every detail, as well as drawer pedestals, cabinets, and bookcases.

Tables

Characterised by lightness of form and refined finishes, the tops feature a natural wood finish with bevelled edges in solid wood. Two aluminium profiles fixed to the undersides of the tops permit the vertical supports to be positioned freely anywhere along their length.

In the case of the round, square, rectangular, and elliptical meeting tables, the vertical support consists of a single central leg. Multiple modules can be configured to create large-format tables, ideal for large meeting spaces.

The leg consists of a disk in contact with the floor, a flange, and a steel column. In the case of the meeting tables, the leg also serves as a riser for the cable management system, completed by cable trays mounted below the top and access hatches mounted flush with the top.

The diameter of the floor disks, flanges, and columns varies depending on the dimensions of the tops. Special hardware can be added to the drawer pedestals for use as vertical supports for the workstations.

Containers

The containers of the Mood series consist of drawer pedestals, open cabinets and cabinets with doors, and modular bookcases. The drawer pedestals, in powder-coated sheet metal, are available with three or four drawers.

The tall bookcases, with a drawer at the base, are available with open shelving, a solid door, or a glass door. The powder-coated structure contrasts with the shelving and the rear panel in wood.
