Born of a reflection by Jean Nouvel regarding the relationship between furnishings and architectural space, the Elementaire series proposes a series of armchairs and sofas with simplified geometries that make them adaptable to a broad range of project scales.

The system includes several modular elements that can be assembled in a linear sequence, together with a two-seat sofa and two types of armchairs.

All of the seating components are available in two types of leather and can have a high or low back. Contoured variable-density polyurethane foam padding is bonded to the wood structure, ensuring a high degree of comfort. The leather upholstery is characterized by an absence of visible seams.

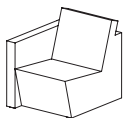

The armchairs can be supported on feet, like the sofas, or on castors. All of the elements of this series are available in fire-resistant versions upon request.
