2025

This lightweight and flexible partition system is based on high-performance modular elements with reduced thicknesses (4 cm). The individual horizontal elements are available in three different sizes that can be assembled vertically to create partitions of various heights. P4 panels are ideal for customising the work environment by defining a range of spaces: protected, reserved, or more open.

The internal wood structure of each panel can be covered in various types and colours of laminate, fabric, or natural wood. The exterior frame in painted aluminium provides for the vertical connections between the panels. A groove along upper profile allows for hanging a range of accessories.

In the transparent or acid-finished glass version, the frame is in polycarbonate and the two panels are mounted flush with the exterior side. Also in this case, the upper profile is contoured to accommodate hanging accessories.

The bottom profiles are equipped with height-adjustable feet for levelling the panel during the assembly phase. A stabilizing foot is available for linear compositions. The panels are joined together by means of two-way, three-way, and four-way joints, or linear or transverse fittings.

The range of accessories available for the P4 Panels include an assortment of shelves in various sizes, a small overhead cabinet with a solid fall-front door, and a collection of other items that serve to personalise the workstation.

SOLID PANELS

Panels with 2 vertical modules
h. 91 cm

- 90x4xH91 cm
S P4 090 091 ..
- 100x4xH91 cm
