The PRINCIPLES micro-architecture collection, designed with flexibility in mind, is composed of elements in sizes S, M, L, XL, and organised into families: tables, soft furnishings, partition panels, spines and sofas.

Available in different shapes, sizes and colours, the elements of the PRINCIPLES collection constitute a true space configurator. All products feature high-tech materials, integrated lighting, soundproofing and wiring for connectivity.

The tables and the desks consists of a black powder-coated metal base and double-layered thick laminate surfaces. They can be manufactured in square, rectangular, curved, and round shapes and have adjustable height in some versions.

The sofas in the PRINCIPLES collection, with their linear or circular shapes, are joined together by means of an invisible connection system to form large seats. The fully wired furniture makes it possible to work virtually anywhere. The sofas, linear or circular, always consist of two elements: a backrest and a seat, and may be in either a single- or double-sided version.

The PRINCIPLES collection, with its strong technical nature, is characterised by the use of a broad spectrum of materials and technologies, starting with fabrics from the world of high-tech sportswear, to carefully selected thick core colour laminates in their colour palette.
