X shelving unit takes its name from the distinctive x-shaped vertical post that forms the main structure. The connection between shelves and uprights creates a very light ceiling-floor partition element, which separates collective work areas from more private and individual zones.

Distinctive elements of X are the red spring loaded ceiling and the adjustable stainless steel foot: together, they guarantee stability to the structure and allow easy reconfiguration.

The structure, in a single- or double-sided version, is available in compositions with 5 or 6 shelves with a height of the vertical uprights ranging from 240 to 269 cm (modules with 5 shelves), and from 270 to 300 cm (modules with 6 shelves).

A converging connector allows the shelf to be clamped to the rack integrated in the upright; it also serves as a power transmission element in the case of a system with integrated lighting.

The choice of finishing materials, ash wood and natural oak, the minimalist aesthetics, the great scalability and the simplicity of re-configuration, allow the X shelving system to fit easily into a wide range of spaces, from workplaces to retail areas. The proposal is completed by a magnetic board with a metal structure available in three sizes and two finishes: melamine, white or grey, and felt.
