The Y table system is designed using the minimum amount of material necessary to ensure maximum stability and, at the same time, give a great sense of lightness.

The Y-shaped steel legs are available in 3- or 4-stem versions. The latter in the four-stem version also acts as a connector, allowing large rectangular meeting tables to be created.

The legs, painted with epoxy powder or galvanised, are easily positioned and completely removable for transport or storage.

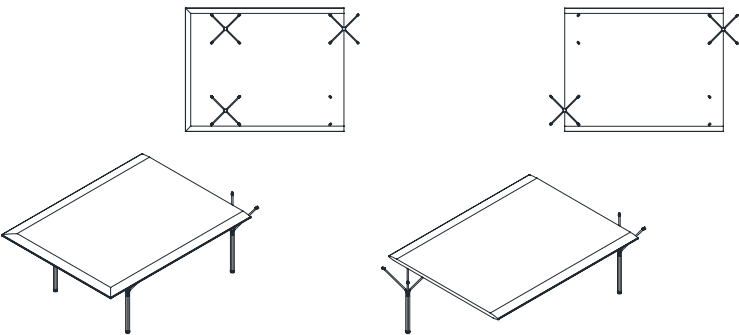

The Y table, available in round (with fixed legs or on castors), square and rectangular versions, in various sizes and heights, is distinguished by its five different types of edge and top finish.

Rectangular tables can be equipped with a central flip access, cable tray and flexible cable riser with a side zipper.
